The University of Leicester	11/2009	MSc Applied Forensic Psychology	Merit (69)
The University of Sheffield	07/2005	BSc Psychology	2:1

Relevant Experience

I specialise in the assessment and treatment of psychological and emotional difficulties arising from personal injury, critical illness/ICU admission, major trauma, and cardiac illness, including PTSD and other emotional disorders. I have held clinical lead positions in clinical psychology services within intensive care, major trauma, musculo-skeletal rehabilitation, cardiac, and chronic pain services. I now work clinically in these areas exclusively.

Consultant Clinical Psychologist, Remedy Healthcare

Rehabilitation of complex, life-changing Musculo-skeletal injuries, including limb loss.
August 2016 – October 2023

Consultant Clinical Psychologist, Rethink Health

Applying psychological science to addressing barriers to optimal rehabilitation outcomes following critical illness, major trauma and cardiac ill health.
August 2016 – October 2023

Consultant Clinical Psychologist, Working Well, The Royal Surrey NHS FT

Clinical lead for a service applying psychological science to protecting staff from the psychological and emotional effects of working in healthcare during the pandemic.
May 2021 - September 2022

Principal Clinical Psychologist, Adult Critical Care, The Royal Surrey NHS FT

Clinical lead for the ICU Clinical Psychology Service.
October 2018 – March 2023

Relevant Training

Excellent in Report Writing – England and Wales. Bond Solon, August 2023

Selected Research and Publications: I have co-authored book chapters, national reports and guidelines advising on the psychological management of hospitalised inpatients.
